

FEATURE 139

NEW REALIGNMENT

Roadway Side	Allows Tie	LRS Package	Feature Type	Interlocking	Secured
C	No	No	Length	Yes	Yes
Responsible Party for Data Collection		Automatically generated from Feature 138			

In this example, Feature 139 automatically records under roadway ID 99010002 from milepoint 0.000 to 1.000 with a value of roadway ID 99010000.

Definition/Background: This feature automatically generates when Feature 138 is coded. It identifies the old roadway ID and milepoint for the roadway segment.

Do not delete Feature 139 or any of its characteristics.

OALIGNID | SECTION/SUB-SECTION OF OLD ALIGNMENT
OALNBGPT | OLD ALIGNMENT BEGIN MILEPOINT
OALNENPT | OLD ALIGNMENT END MILEPOINT

HPMS	MIRE	Who/What uses this Information	Required For	Offset Direction	Offset Distance
N/A		Planning	Automatically generates when Feature 138 has been coded.	N/A	N/A

Value for Roadway ID of Old Alignment: 8 Bytes: XXXXXXXX—Automatically generates

Value for Old Alignment BMP: 6 Bytes: XXX.XXX—Automatically generates

Value for Old Alignment EMP: 6 Bytes: XXX.XXX—Automatically generates

The old alignment retains data for historical purposes. The data from the old alignment should be retained for at a minimum of one year after the roadway has been physically deleted, then after the one-year anniversary date of the physical deletion, the data may be removed from RCI. Feature 140 also should be changed to Deleted (physically removed) or Inactive (not in use).
